SS200

TRANSCENDING
BARRIERS METAL

WEATHER TIGHTNESS WARRANTY APPROVED

The SS200 roof system is designed for heavy duty commercial and industrial applications. Structurally engineered, this 2" mechanically seamed structural metal roof system will meet or exceed most windload and government requirements from coast to coast. Hidden fasteners in fixed or floating clips allow the roof system to withstand the negative effects of thermal movement. As a more grown-up version of the SS150, many of their capabilities are similar. Showcase your next projects attractive design using a variety of production options.

PROFILE OPTIONS

- Single lock panel
- Double lock panel
- Radius panel (single or double lock)

PRODUCTION OPTIONS

- Factory made or field rolled to exact lengths.
- Optional: striation, flat panel, clip relief

INSTALLATION

Can be installed over steel decking with Polyiso, or plywood decking with high temp ice & water shield.

SLOPE

Recommended minimum slope 1/2:12

Panels have demonstrated compliance with UL580, Class 90.

Product Description: Ultra-Clad pre-finished metal features Dura Coat Durapon 70% full strength PVDF paint finishes formulated with Cool technology. This high performance product provides the ultimate in resistance against fading and weathering. In addition to our standard colors, custom colors are also available upon request.

Color Samples: Colors shown represent the actual colors as accurate as modern printing technology will permit. Colors represented on electronic charts may not match actual material. All colors should be verified using actual metal samples. Mismatch of electronic color representation and actual material shall not be accepted as a cause for rejection. Free metal samples are available upon request.
